Just completed plan with Val's last updates and back in EDMS--also in PDF. Just a heads up that Ken wants to see the contract info in both the current schedules and in the new WSA Master Plan Template that I am building for him. I believe he is going to talk to Robin at his staff meeting today about his needs for certain contract data in the schedules.

Dave, would you/could you also provide the document in a different format so others without MS Project could review until they receive the software? Thanks, -L

Out in EDMS. Just got a few changes from Val. Got to go to a meeting but should have the final version back in EDMS by 2.

Done. Has not had a final review from Val with her current updates. Was giving her until 2 today to review updated plan before putting into EDMS.

Loreen,

I have shorten the titles and re-sequenced the task ID #'s on the left side. By the way, are you still planning to put this plan in your EDMS workspace, grant me access to read and write and send me the path? I have saved the previous version in case we have to go back to it.
